

Mohamed Amine GUELMAOUI

- **Email:** amguelmaoui@gmail.com
- **Location:** Montréal, Quebec

Offensive Security Consultant with hands-on experience in web application, API, Active Directory, and infrastructure penetration testing. Holder of the Hack The Box Certified Penetration Testing Specialist (**CPTS**) and Certified Red Team Professional (**CRTP**) certifications, demonstrating practical expertise in offensive security and modern attack methodologies. Conducted penetration testing engagements for **offshore** and on-site clients across **government, banking, oil & gas**, and other critical sectors, both as a **cybersecurity consultant** and **freelance penetration tester**. Experienced in vulnerability assessment, exploitation, technical reporting, proof-of-concept demonstrations, and providing actionable remediation recommendations to strengthen organizational security.

Areas of Expertise

- Mainly Penetration Testing (Web, API, Infrastructure, Active Directory, Wifi).
- Vulnerability Assessment and Research.
- Incident Response and Threat Hunting.
- IT Solutions integration.

PROFESSIONAL EXPERIENCE

Realistic Security, (Cyber Security Service Provider)
Cyber Security Specialist / Consultant

Mars 2023 – Present

- Vulnerabilities Assessment & Penetration Testing (**Infrastructure / Active Directory / Web / API / Wifi**).
- Incident Response and Threat Hunting.
- Customized Development of DFIR and Incident Response tools and techniques.
- IT Solutions integration.
- Outsourcing as SOC Analyst (2days/week).

Societe Generale, (Bank)
SOC Analyst (OutSourcing)

May 2023 – Janvier 2025

- Alert of CERT-group treatment.
- Data Loss Prevention alert treatment.
- Suspicious email treatment (Phishing/Spam).
- SIEM Alerts treatment.

Djezzy, (Telecommunication Operator)
Cyber Security Engineer

July 2022 – February 2023

- Install, Administer, and troubleshoot organization's security solutions.
- Perform regular scans and ensure that latest security patches are applied.
- Creates, modifies, and updates SIEM rules, SIEM administration, management and monitoring.

Naftal, (Oil & Gas)
Cyber Security Engineer

July 2021 – July 2022

- Administer, configure, security solutions.
- System administration & patch management.
- Perform system and application-level risk, vulnerability assessment and provide remediation plan.
- Creates, modifies, and updates SIEM rules, SIEM administration/management/monitoring.

Onsite & Remote Consultancy Project

Penetration Testing & RedTeam engagements 2024-2026

- Web & API Penetration testing (Offshore, freelance, and onsite clients).
- Infrastructure Penetration testing (Offshore and onsite clients).
- Active Directory Penetration Testing (onsite clients).
- Wireless Penetration Testing (onsite clients).
- Phishing campaigns & Physical RedTeam

Cyber Security Solution Deployment & Training 2025-2026

- Metasploit Pro Deployment & Training for client team

Threat Hunting & Incident Response 2023-2026

- Managed Detection and Response, Threat Hunting & Compromise Assessment.
- Incident Response Playbooks Creation.

SIEM Deployment, Support and Optimization 2023

- ELK & Splunk Use Cases Development.
-

CERTIFICATIONS

HackTheBox	Certified Penetration Tester Specialist (CPTS)	10-2025
eLearnSecurity	Certified Incident Responder (eCIR)	07-2024
Altered Security	Certified Red Team Professional (CRTP)	03-2024

EDUCATION

USTHB University Algeria	Network & Distributed Systems Master (Maitrise)	2020
University of Algiers 1	Information Systems License	2018

VOLUNTEERING & COMMUNITY INVOLVEMENT

CTF Competition Mentor / Guide	2025
University Cybersecurity Project Creation Event / as Jury Member	2025

TECHNICAL PROFICIENCIES

Penetration Testing: Network Infrastructure & Wireless (WIFI), Active Directory Security, Web Application Security, API Security, Privilege Escalation, Post-Exploitation, OSCP-aligned methodologies, Bloodhound, Burpsuite, Metasploit, Sliver, Certipy, etc... .

Incident Response (Basic): Manual, Velociraptor, Playbooks.

Vulnerability scanners: AppSpider, Nexpose, Nessus, Tenable SC.

System Administration: Basic

SIEM (Basic): ELK, ArcSight, Splunk.

Basic Scripting and Coding: C/C++/C#, Java, MySQL, Python, JavaScript.

Operating Systems: Windows, Linux.
